Over the last fiscal year, we utilized our strategic roadmap to guide efforts on many fronts that include monitoring and improving clinical outcomes, enhancing patient experience, developing new services and investigating new care models. Our financial health continued to improve through an expanding service base. There was energy from many to drive the changes and make a difference in the care provided. In the annual report we will be highlighting many of these efforts and successes.

Going into Fiscal Year 2017, we will continue to dedicate time for care model design especially related to primary care, improving patient experience, and continue the focus on improving clinical outcomes. One thing we learned this year was to slow down. This past year we did take on too much too fast. Going forward we will focus on the vital few, making sure when we commit, that we have the time and resources needed to see those efforts through from start to finish. This journey will include a new term “CroixCares.” CroixCares is about quality, patient experience, and provider and employee engagement. Expect to hear more about this throughout 2017.

A special note on Arne Lagus, MD—50 years as a practicing physician. When Arne started back in 1966, Lyndon B. Johnson was President, Medicare became available, and Canada passed the Universal Health Care Law. To see Arne in Clinic, it would cost $4. Practice required doing house calls during lunch or after clinic, being on call “1 in 7” meant you were responsible for the ER, hospital, and obstetrics. Arne has had a meaningful impact on the many residents in the communities served. Thank you Arne for your 50 years of service.

To close, I want to extend a heartfelt thank you to Harlen Hegdal for his 10 years of service on the Governing Board and half of those years serving as the Board Chair. Harlen also served on the Finance Committee throughout his tenure. He has always been committed to our mission, vision, and desire for SCRMC to remain a viable independent health care player in the North St. Croix Valley. I will miss Harlen’s insight and feedback and wish him the best as he moves on to new adventures.

Dave Dobosenski, CEO

On behalf of the St Croix Regional Medical Center’s Board of Directors, we had an excellent year financially. We continue to move forward on enhancing services even with a challenging environment. I am proud of the new Kinisi Institute that allows our patients to get the care they need in a patient-centered manner. We invested in robotic surgery, which makes us the only provider in North St. Croix Valley offering this enhanced clinical service. We are hopeful that in the future we will make progress with the Village of Webster on a future clinic site that will enable us to expand and add needed services for that part of the market place.

I am now completing my tenth year on the Board, the past five as Board Chair. Based on corporate bylaws, community trustees can serve a maximum of two terms or ten years. So, I am transitioning off the Board. As I reflect over my tenure, I am amazed at what we have accomplished. When I first started on the Board, SCRMC was still recovering from a long period of financial challenges. Now, we are not only in great financial shape but we are the regional leader for health care. This success is the result of our dedicated leadership, our amazing physicians and advanced practitioners, and all of the wonderful staff, volunteers, and Foundation representatives.

Being strong financially enables us to focus on patient care, support care model development, and create partnerships that will allow us to focus on health and wellness and strive to be the choice for superior, high value care for years to come.

In closing, I will miss working with both my fellow Board members and the Medical Center staff. Of the many boards I have served on, the SCRMC Board is the one that you can see the direct results of your work and efforts in a very human way. I leave confident that the Medical Center will continue to be the area leader in care for the community residents and patients served.

Regards,

Harlen Hegdal, Board Chair
Sepsis Initiative
Through the end of Fiscal Year 2016, 97% of sepsis patients were appropriately treated within the 3-hour bundle. This work was publicly recognized in the Wisconsin Hospital Association’s 2015 Quality Report.

Hospitalist Model
In January 2016, a new hospitalist model of care was implemented in Med/Surg/ICU. This model includes three physicians and three advanced practice providers that specialize in the care of hospitalized patients. In the new model, a provider is available in-house from 7AM to midnight daily. Between midnight and 7AM, providers are on-call. Expanded in-house provider hours improve communication with patients, families, nursing personnel, and ancillary staff, and increases consistency in admitting, rounding, and other care processes.

Hospitality Aides
Nutrition Services personnel saw an opportunity to improve the meal experiences of patients and their family members in the Med/Surg unit. This improvement project implemented hospitality aides who visit patients to complete menus, and pass and pick up meal trays.

CroixConnect—Updated Intranet
The SCRMC intranet is a key tool for internal communications necessary to engage employees and providers. The IT department updated this private network, which now provides significantly expanded functionality, including online policy management, file sharing, staff alerts/blogs, and much more.

Patient Literacy Initiative
Health literacy affects the total patient experience, from their overall health to their perception of the care provided. Literacy skills are the strongest predictor of health status, more than age, income, employment status, education level or racial/ethnic group. Nationally, those who have a low literacy level have a higher mortality rate. The Patient Education Staff reviewed and rewrote OB discharge packets, sleep study packets, cardiology test preps and Kinisi Institute rack cards to meet a 6-8th grade reading level.

First Pamper Me Pink: Breast Health Evening Events
To raise awareness of women’s breast health, the Imaging Department along with Surgery held the first Pamper Me Pink Evening. Women that attended the event enjoyed pampering such as mini massages, pink refreshments and skin care tips while learning about breast health and cancer prevention.

Volunteer Partners Salad Luncheon Celebrated 50 Years
This year marked the 50th Year of the Volunteer Partners Salad Luncheon. Chairing the event was, Volunteer Partner, Carolyn Ward.

Garden
The staff of State Street Cafe with the help of Steady Hand Farms, planted a garden to use the produce in the salad bar. The garden has lettuce, tomatoes, green peppers, snow peas, cucumbers, green onions, kale, carrots, basil, thyme and rosemary.

Robotics
SCRMC welcomed the arrival of a da Vinci Si HD Surgical System, an advanced robotic surgery system that allows our surgeons to perform more complex minimally invasive procedures such as prostatectomy (prostate removal), hysterectomy (uterus removal), different lower and upper gastrointestinal surgery, and hernia repair.

WE ARE LISTENING!
There have been a lot of changes over the past few years within SCRMC, including a new medical record system, new community clinics and the implementation of new reporting requirements. With all the changes, SCRMC wanted to make sure we always have patients and their family members at the center of everything we do. What better way to do that than to directly LISTEN to our patients!
In February, eight Patient Focus Groups were held which included a total of 76 patients.

Since February we have put into place several initiatives to improve our patients’ experiences with every encounter. We are focusing on quality of care to ensure the best outcomes for every patient. We are also making strides to improve processes within our organization to ensure smooth hand-offs and improved communication.
The Patient Focus Groups were eye-opening and we plan to implement this sort of feedback on an on-going basis. We are adopting a model known as Patient- and Family-Centered Care (PFCC). PFCC is an approach to planning, delivery, and evaluation of health care that is grounded in mutually beneficial partnerships among health care providers, patients, and families. It redefines the relationships in health care. It means partnering with patients and their families in both inpatient and outpatient settings, not only in their own care, but also in policy development, building planning, review of patient education materials and other SCRMC initiatives. We are excited to take this path which will transform the way we provide care. We invite anyone who is interested and is currently a patient or family member to apply to become a Patient Advisor through this PFCC effort at SCRMC.

Volunteer Neal Route, a St. Croix Valley native, looked at the world through different eyes than most. He was legally blind. But that is not what made Neal so special. Throughout his life, he held “giving back to the community” near to his heart.

He grew up in Polk County in the little town of Ubet. At 17, he volunteered for the Navy where he served as a mine sweeper in the South Pacific during World War II. When he left active duty, he went on to Navy pre-midshipman school at Princeton and then to the University of Michigan. It was there he met Patricia, a nurse-in-training, on a blind date. He recalls that the first time he saw Patricia, he thought to himself, “Gee, that's the girl for me.” After a courtship of letters and a few trips, Neal and Patricia eloped. At that time, the nursing program did not allow students to get married so they had to keep their marriage a secret. However, that secret lasted only a few days and Patricia was back in Ubet with Neal the following weekend.

They settled in St. Croix Falls, where they owned and operated the St. Croix Falls Bakery. Prior to children, Patricia worked in the original hospital lab with Dr. Jake Riegel. While Neal enjoyed the bakery business, something was missing. He applied for local police positions but had to move to Milwaukee to become a police officer. Neal spent 25 years on the force, giving back to the community and mentoring young recruits. In the 1970s, he moved his family back to St. Croix Falls to experience the slower pace of a small town. Neal worked at various jobs including several years in the 1980s at the St. Croix Falls Clinic, and Patricia volunteered many hours at the hospital. Later they moved to Osceola but they continued their “giving back” by knitting newborn baby hats. Using a simple knitting loom Patricia would make the preemie hats. After Patricia passed away in 2012, Neal established a scholarship in her name to encourage young adults to pursue a nursing profession. Neal continued to knit baby hats in a variety of colors, but his favorites were the green and gold ones, though he did do a few purple and gold just to be fair.

On August 21st of this year, Neal Route passed away at 91. His legacy of “giving back to the community” is an inspiration. Thank you Neal.

Volunteering can not only make you feel good, it can also help your mental health.

Volunteer Partners at SCRMC

141 Volunteer Partners gave 16,981 hours of service

Donated $32,886 towards:
- New wheelchairs for patients at all locations
- SciFit Stepper for Physical Rehabilitation Services
- I-Stat Analyzers for St. Croix Falls and Frederic Clinics
- Waiting room furniture for Physical Rehabilitation at Ingalls Clinic
- Blanket warmer for Surgery
- Spiritual care materials
- Baby spoons, preemie car seats, and memory boxes for Obstetrics
- Catheterization trainer
- Dementia awareness plays
- Reiki class
- Nutrition portion plates for Education

Scholarship Program awarded $7,000 to 12 very deserving students

Neal and Patricia contributed over 500 baby hats to the Birthplace at SCRMC.
The St. Croix Valley Health Care Foundation marked another successful year of fundraising and continuing to fulfill its mission. This year donations included support for high definition surgical equipment, e-ICU and a newborn hearing screener, not to mention over $5000 in scholarships.

Summer Golf Classic
The Annual Golf Classic is held the third Friday in June in Frederic at the Frederic Golf Course. The funds raised support the Foundation’s mission of providing patient care improvements, equipment and furnishings and health care scholarships to students in the region served by SCRMC.

A unique Glow Ball Golf Tourney is held in Webster at Fox Run Golf Course in late August as an added event to raise funds for scholarships and patient care equipment.

Fall Gala Fundraising Dinner
A champagne reception. Great food. Excellent company. Exciting raffles and auction. All this and more have brought together supporters of the Foundation’s work each September for the past 20 years at the Trollhaugen Conference Center. Individuals and businesses generously donate all items sold through the auctions and raffles, and even a live dessert auction created excitement this year.

Health Care Advocate Award
Another very special annual event takes place at the Gala Dinner—naming the winner of the Foundation’s Annual Health Care Advocate Award. Each year the Foundation Board chooses an individual from our community whom they believe has made a significant contribution to the health care of the community.

The award recognizes the efforts of an individual who promotes the ideals of health care and has contributed countless hours to further the mission of health care in the region.

Mary Erickson, Director of Surgical Services, received the Health Care Advocate Award for 2015 from Laura Jensen, VP of Patient Care Services.
New Staff at SCRMC

Valerie Haltaway-Kuehl, PA-C  Pulmonology
Shannon Doyle, MD  Nephrology
David Warden, MD  Nephrology
Jennifer Beauvais, GNP  Extended Care
Morgan Foizie, PA-C  Hospitalist
Rebecca Lietzow, FNP  Hospitalist
Heather Ash, AGNP  Hospitalist
Pradeep Wardhan, MD  Hospitalist
Richard Pasquarella Jr., PA-C  Urgent Care
Therese Durkin, MD  Family Medicine
Theresa Gunnarson, MD  Emergency Medicine

Patient Comments

“I was thoroughly satisfied with the surgeon and the surgery staff. Everyone was very pleasant and sincere. I was given detailed information about my procedure and after care. I would recommend SCRMC to anyone who needed surgical care.”  --- Anonymous

“We just want to thank you, the nurses and doctors at St. Croix Regional Medical Center, for helping and caring for us and the baby. While we were there, we couldn’t have asked for a better hospital, doctors and nurses! Thanks to you all!”  --- M. M.

“I just want to say, I’m 73 years old, I’ve had 7 surgeries. I was originally from the cities. No one has ever listened to me with my concerns. I’ve always had reactions to medications. This time for the first time my doctor, Jill Ties, listened to me, suggested different things that might make things better for me. Even the staff listened. Her anesthetist made this the first surgery I could say went wonderfully from start to finish. And the after care has gone well too! I will never go back to the cities for any medical care or problems. Thank you for hiring people who care and know what they are doing.”  --- Anonymous

“Dr. William Beyer has changed my life. He listened to me with great care and he was able to implement a care plan that has exceeded my expectations. He’s very professional but still down to earth, and cares as much for my daily struggles as he does of my overall care. He’s very easy to talk to and has a vast knowledge of mental health conditions and how to treat them.”  --- Anonymous

“Thank you for the excellent care for me and my wife. The doctor on call was wonderful. Also Jonn Dinnies has taken excellent care of my wife and myself. We are more than happy with your hospital service and also the clinic in Frederic. Thank you so much!”  --- G. L.

“Dr. Ryan Bourdon and the entire ER staff were great. Despite how extremely busy they were, they took the time to assure their patients ‘top notch’ care and attention. Very proud of our local, medical facility and staff. Best ever!”  --- Anonymous

2016 marks the year that Family Practice Provider Dr. Arne Lagus celebrates 50 years of providing medical care for patients at St. Croix Regional Medical Center. In 1966, he was the seventh physician to join the medical staff of the St. Croix Falls Clinic.

Dr. Lagus attended the University of Minnesota Medical School and is Board Certified in Family Medicine and Geriatrics. He was involved in expanding the hospital in 1972 and the clinic in 1985.

In addition to his medical practice, Lagus has served on the Clinic Board of Directors, the Board of Wisconsin Academy Family Physicians and has been active for many years in the Wisconsin Medical Society and the St. Croix Falls Rotary.

Dr. Lagus and his wife, Miriam, also have been instrumental in bringing medical exchange students from the University of Münster, in Münster, Germany, to St. Croix Falls each year from 2000 through 2003. These fifth-year medical students spent four to six weeks in the summer doing rounds with Lagus at SCRMC and seeing local nursing home patients.

Dr. Lagus’ interest in sports medicine is not purely academic; he’s an avid cross-country skier who races regularly. He completed the series of World Loppet Cross-Country Ski Races that take place around the world. This past winter marked his 38th consecutive Birkebeiner Ski Race in Hayward, Wisconsin.

Dr. Lagus advocates an active and healthy lifestyle for all. In addition to cross-country skiing, he and Miriam enjoy hiking and hiking. They have two sons, John and Mark, and three grandsons, Sam, Matthew and Jacob.
Celebrations, Growth and Expansions

Cancer Center of Western Wisconsin Celebrates 5 Years

June 29 marked the 5-Year Anniversary of the Cancer Center of Western Wisconsin. The celebration included tours of the Journey Garden and the newly installed mosaic bird houses near the hospital patient wing. Attendees had the opportunity to meet and visit with participating artists, enjoy music and refreshments. SCRMC is proud to partner with the CCWW to provide services to the patients in our region.

Celebrations, Growth and Expansions

Specialty Care Outreach
Traveling for quality health care can prove to be a challenge or an inconvenience. St. Croix Regional Medical Center Specialty Providers deliver high quality care at communities throughout our region. Our Specialty Care Outreach offers patients convenient local access to medical experts in General Surgery, Internal Medicine, Audiology, Oncology, Pulmonology/Sleep Medicine, Neurology and Allergy/ENT.

Cancer Center of Western Wisconsin Celebrates 5 Years

June 29 marked the 5-Year Anniversary of the Cancer Center of Western Wisconsin. The celebration included tours of the Journey Garden and the newly installed mosaic bird houses near the hospital patient wing. Attendees had the opportunity to meet and visit with participating artists, enjoy music and refreshments. SCRMC is proud to partner with the CCWW to provide services to the patients in our region.

Celebrations, Growth and Expansions

St. Croix Falls Retail Pharmacy Expansion
The St. Croix Falls Pharmacy was remodeled and is on the first floor of the St. Croix Falls Clinic building. The remodeled pharmacy provides an inviting environment, setting the stage for an enhanced patient experience. The expansion provides the space for patient waiting and private medication counseling. It includes the addition of a retail shopping area with over-the-counter medications, medical equipment, and gift items. The expansion added space needed for future pharmacy services including discharge prescriptions for hospital and surgical patients, and “Medication Check-up” appointments with pharmacists.

In January, St. Croix Falls Pharmacy expanded hours to support the medication and medical supply needs of Urgent Care patients. The pharmacy is open Monday through Thursday from 8:30 AM to 8 PM, Friday 8:30 AM to 5 PM and Saturday, 8:30 AM to 12 PM.

Adoray Treasure Store
Adoray Treasures From The Heart® stores help raise funds in support of Adoray Home Health and Hospice patients in our communities. To support the communities of Polk County, Adoray opened a new Treasures from the Heart in downtown Osceola, WI. Adoray Home Health & Hospice and St. Croix Regional Medical Center collaborate to meet the needs of St. Croix River Valley residents.
The Kinisi Institute for Movement is located on the third floor of the St. Croix Falls Clinic at 216 S. Adams Street. Almost 15 months ago the planning for the 11,000-sq-ft facility began and Kinisi opened on July 5.

Kinisi Institute for Movement is musculoskeletal care re-imagined. It brings together a unique, team-based model of care with exceptionally trained specialists. As a patient-centered institute, Kinisi Institute for Movement uses an enhanced care navigator system that allows for a coordinated process to help improve quality of care and patient experience. Patients receiving care at one of Kinisi’s multiple specialties will have access to an integrated clinical care model and a supportive experience that will promote healing and confidence as we work together toward better health. We will empower and support patients through their own personal journey, all in one place.

Kinisi Institute for Movement offers 21 exam rooms, state of the art digital x-ray services, a lobby that overlooks the St. Croix River and an educational hub for consultations. Other services include: wellness coaching, care coordinators and complementary medicine.
Clinic (CG CAHPS)
The Clinician and Group Consumer Assessment of Healthcare Providers and Systems (CG CAHPS) survey is utilized for patients receiving clinic care at all five SCRMC locations. This survey also includes supplemental questions provided by the survey vendor to gather additional experience information.

Emergency Department
Fiscal Year 2016 was the first full year of patient experience surveying for the Emergency Department. Standardized survey tools are less-commonly used for patients seen in emergency departments. SCRMC used a set of survey questions provided by the survey vendor, much like the Emergency Department.

Outpatient Surgery
Fiscal Year 2016 was first full year of patient experience surveying for outpatient surgery patients. SCRMC used a set of survey questions provided by a survey vendor, much like the Emergency Department.
